No Problems Only Solutions

The Eaton Oil Tools, Inc. DL Compression Shear Packer is run in compression as an economical, compact tool to isolate casing and perforations or for Casing Pressure Testing. This packer is set by 1/4 left hand rotation of the tubing and then setting weight equal to 2,400 lbs per OD inch of the packer. To release this tool the tubing is pulled on and the packer automatically reverts into the release position

Special Features

- Long element for increased packoff
- Safety tubing release
- Deep wickered slips
