

Section Milling

Section Mills

Section mills are primarily used to mill sections in the casing for: Sidetracking, gravel packing, and/or perforation zones. Eaton's section mills are available in a variety of OD sizes, ranging from 3 1/4" to 9" O.D.'s. The blades are dressed so that all blades simultaneously mill the casing, with the milling rates usually limited by the ability of the fluids to remove the cuttings from the hole.

Casing size	Top Connection	Body O.D.
4 1/2"	2 3/8" Reg.	3 1/4"
5 1/2"	2 7/8" Reg.	4 1/4"
7"	3 1/2" IF	5 1/2"
7 5/8"	3 1/2" IF	6"
9 5/8"	4 1/2" or 6 5/8" Reg.	8 1/4"
10 3/4"	6 5/8" Reg.	9"
