

# Rental Tools

**EATON OIL TOOLS, INC.** provides various rental tools for a diverse collection of oilfield operations. Throughout our facilities, all equipment components and assemblies are subjected to continuous quality assurance, including third party inspections of all components. Maintenance of all components begins with a visual and non-destructive inspection, followed by a complete multi-step inventory process. Prior to all projects a pre-job check list is made and completed before any equipment is shipped out for service. Eaton Oil Tools, Inc. is totally committed-throughout our company-to providing quality tools and services that perform.
